PROFILE

Information Technology undergraduate at Masinde Muliro University of Science and Technology and hands-on software product builder focused on full-stack application development, backend engineering and practical AI integration. Develops digital products addressing real user and business needs, with project experience in web applications, relational databases, role-based systems, learning platforms and workflow automation. Seeking to contribute to a software engineering team while growing in scalable architecture, cloud/DevOps and AI-enabled systems.

TECHNICAL SKILLS

Languages	Java, JavaScript, TypeScript, Python, SQL, C/C++
Frameworks	Spring Boot, Node.js, Express.js, Django, React, React Native, Next.js
Data & services	PostgreSQL, MySQL, MongoDB, Supabase, Cloudinary
Tools	Git/GitHub, Docker, Linux/Ubuntu, VS Code, REST APIs
AI & integration	LLM/API integration, RAG concepts, embeddings/vector search, M-Pesa Daraja integration work

SELECTED PROJECTS

Kilele Archade — CBC Learning Platform

Building a digital learning platform for learners, parents and teachers. Project scope includes learning dashboards, AI-tutor capabilities, quizzes and revision workflows, teacher-managed assessments, examination flows and subscription/payment features. **Technology areas:** React/Next.js, Supabase/PostgreSQL, AI APIs, RAG/embeddings and cloud deployment.

Apex-Rental — Property Management Platform

Developing a rental-management PWA for landlords, property managers and tenants, covering property/unit and tenant records, rent balances, vacancy tracking, repair reporting, role-based access control, notifications and reporting. **Technology areas:** web development, relational data modelling, RBAC, image storage and M-Pesa-oriented payment workflows.

Captive Portal & Wi-Fi Access Automation

Technical design and engineering work for a paid Wi-Fi captive portal workflow, including customer authentication, internet packages, network access management and payment automation. **Technology areas:** Node.js, PostgreSQL, MikroTik integration concepts and M-Pesa Daraja.

EXPERIENCE & LEADERSHIP

Software Developer / Product Builder — Independent Projects

Takes software ideas from problem definition into implementation, contributing across frontend, backend, database design and third-party integrations. Works with product stakeholders to translate requirements into usable features.

Developer — Cine Creatives

2025 — Present

Develops and maintains web systems used by the business and its clients — building backend services, integrating third-party APIs and managing deployments across database, API and frontend work.

Founder & Lead Innovator — Apex

2025 — Present

Owns the product direction, system architecture and core technical decisions for Apex-Rental, a property-management platform. Designed multi-tenant data models, role-based access control, payment and reporting workflows.

EDUCATION

Bachelor of Science in Information Technology

Masinde Muliro University of Science and Technology

Currently progressing from second year into third year | **Expected graduation: 2028**

ADDITIONAL

Professional interests: backend engineering, cloud/DevOps, cybersecurity, data and AI/ML.
